

# **multifunctional gemini surfactants**

*„... WE DISPERSE, SOLUBILIZE,  
INHIBIT CORROSION,  
REDUCE SURFACE TENSION,  
CATALYZE, KILL GERMS ... WE  
CAN MUCH, MUCH MORE ...*

we are everywhere ... industry,  
agriculture, medicine need us ...  
we are in the mining, construction,  
papermaking, metallurgy ... household  
market does not exist without us  
... and petrochemical industry  
simply loves us - we do not  
give any chance to SRB -  
biocorrosion is just a memory ... „

... Yes, yes ... that's us...

**multifunctional  
surfactants  
gemini  
surfactants**

We are up to 100 times  
better than conventional  
monomeric surfactants.

# We are simply the NUMBER ONE...

We are just like two in one ... we are bigger ... we are better ... therefore you need much smaller amounts of us ... that is why it is hard to find us in the environment ...

Water likes us ... oil likes us too ... we have a very flexible HLB and we can change like a chameleon ... we adjust to any environment ...

Some say about us

## ...innovative surfactants ...

Those who know us, will tell you more ... much more ...

And what about you ... would you also like to meet us?
